-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-44 of U.S. Patent No. 6,617,032 (Rickner et al.) in view of MacGregor et al. (U.S. Patent 5,595,701). Rickner et al., hereafter "Rickner," claim a composite having the same layers with the same limitations as the layers formed in the instant application. It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use the spraying method of MacGregor et al., hereafter "MacGregor," in order to form the layers in Rickner's composite article in order to provide fast production of the article.

Allowable Subject Matter

In the event that a proper timely filed terminal disclaimer is made of record with the office, it is believed that claims 1-37 would be allowable.

Art Unit: 1732

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record neither teaches nor suggests the claimed method for forming a composite structure having the specifically claimed layers and exclusive properties thereof. The composite product formed has been found patentable (see US 6617032), and therefore since the instant method forms the patented composite having the same layers and properties, it is also deemed novel over the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with regard to layered composite articles and their method of manufacture:

U.S. Patent 4,000,028 to Hoey

U.S. Patent 4,797,320 to Kopp et al.

U.S. Patent 5,154,871 to Wagner et al.

U.S. Patent 6,165,308 to Chen et al.

U.S. Patent Application Publication 2002/0086115 to Lamers et al.
